Summary

Full-Stack Developer specializing in the MERN stack with hands-on experience in building scalable, cloud-ready web applications. Proficient in RESTful APIs, architecture, database optimization, authentication, and performance tuning. Experienced in version control (Git), and CI/CD pipelines to deliver secure, high-quality software. M.Tech graduate in AI and ML.

Work Experience

MERN Stack Intern

July 2025 – Present

Panacea Infosec Pvt. Ltd.

- Developed and maintained scalable full-stack web applications using the MERN stack. Built responsive UI components with React, JavaScript, and Tailwind, and integrated REST APIs with MongoDB for efficient data handling.
- Performed debugging, testing, and code reviews, Git-based environment to deliver production-ready software.

Web Development Intern

Jan 2025 – Jun 2025

Techoxa Technologies Pvt. Ltd.

- Contributed to a single-vendor e-commerce web application using HTML, CSS, Bootstrap, jQuery, PHP, and MySQL, handling backend logic, database operations, and UI components.
- Collaborated with senior developers using version control and structured workflows to deliver responsive, high-performance, production-ready features.

Projects

E-Commerce Website

AI-Enabled Full-Stack Web Application [Source Code](#)

- Built a full-stack e-commerce platform with Next.js featuring product catalog, cart, checkout, and search/filtering, integrated with Gemini AI, Neon, Clerk, and ImageKit.
- Implemented automated order processing and notifications using Inngest to ensure a scalable, high-performance architecture.

Startup Portal

MERN Stack Web Application [Source Code](#)

- Developed a full-stack startup portal using the MERN stack, connecting entrepreneurs, investors, and mentors with responsive dashboards and profile management features.
- Implemented JWT authentication, role-based access control, and optimized REST APIs for secure, scalable, high-performance backend services.

URL Shortener Application

Backend Web Application [Source Code](#)

- Developed a backend-driven URL shortening service with Node.js, featuring unique short code generation, high-performance redirection, and input validation.
- Integrated MongoDB for URL storage, click analytics, secure database operations, and optimized queries to ensure data integrity and application security.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, PHP
- **Frontend Technologies:** HTML5, CSS3, Tailwind CSS, Bootstrap, React.js, Responsive UI Design
- **Backend Technologies:** Node.js, Express.js, RESTful APIs, JWT Authentication
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Version Control & Collaboration:** Git, GitHub Development, Code Reviews
- **Tools & Platforms:** VS Code, Postman, Vercel, Netlify, WordPress, Deployment & Debugging Tools

Education

M.Tech – Artificial Intelligence and Machine Learning NIMS University, Jaipur CGPA: 9	<i>2022 – 2024</i>
B.Tech – Computer Science and Information Technology Dronacharya College of Engineering, Gurgaon Percentage: 61%	<i>2017 – 2021</i>
Class XII – CBSE Kerala Public School, Rewari Percentage: 68%	<i>2016 – 2017</i>
Class X – CBSE Kerala Public School, Rewari CGPA: 9	<i>2014 – 2015</i>

Key Competencies

- Problem-solving and analytical thinking
- Team collaboration and communication
- Adaptability to new technologies
- Time management and task prioritization
- Continuous learning and self-improvement
